Subject: VZ droping TCP

Hi,

I found strange problem using mysql on VZ.
Every second connection is not unsuccessful and returning error:
ERROR 2013 (HY000): Lost connection to MySQL server at 'reading initial communication packet', system error: 0

Also tried nmap to this VZ - every second scan returning no result.

The ping running well without dropping packets.

Any TCP connection to the HN is fine.

Any suggestions?

Thank you.

Please, neglect this topic.
After adding the proper entry in hosts.allow everything is OK.
It seems that mysql is stupid....
