Hello,

I just want to add some interesting information. While playing with these options
/proc/vz/devperms file is useful:

```
# cat /proc/vz/devperms
Version: 2.7
  0 b 016 *.*
  0 c 006 *.*
# vzctl set 201 --devnode hdb1:w --save
Setting devices
Saved parameters for VE 201
# cat /proc/vz/devperms
Version: 2.7
  0 b 016 *.*
  0 c 006 *.*
  201 b 002 3:65
```

The format is the following:

<veid> <block(b)/character(c) device> <permissions> <device major>:<device minor>

HTH,
Vasily
