I start iptables using service iptables start:

Which sends

service iptables start

Flushing firewall rules: [ OK ]

Setting chains to policy ACCEPT: mangle filter [ OK ]

Unloading iptables modules: [FAILED]

Applying iptables firewall rules: [ OK ]

-----

-----

Then I did the following functions for you:

iptables -L -nv

Chain INPUT (policy ACCEPT 0 packets, 0 bytes)

pkts	bytes	target	prot	opt	in	out	source	destination
62	4986	RH-Firewall-1-INPUT	all	--	*	*	0.0.0.0/0	0.0.0.0/0

Chain FORWARD (policy ACCEPT 0 packets, 0 bytes)

pkts	bytes	target	prot	opt	in	out	source	destination
324	59500	RH-Firewall-1-INPUT	all	--	*	*	0.0.0.0/0	0.0.0.0/0

Chain OUTPUT (policy ACCEPT 354 packets, 46842 bytes)

pkts	bytes	target	prot	opt	in	out	source	destination
------	-------	--------	------	-----	----	-----	--------	-------------

Chain RH-Firewall-1-INPUT (2 references)

pkts	bytes	target	prot	opt	in	out	source	destination
0	0	ACCEPT	all	--	lo	*	0.0.0.0/0	0.0.0.0/0
0	0	ACCEPT	icmp	--	*	*	0.0.0.0/0	0.0.0.0/0
			icmp type 255					
0	0	ACCEPT	esp	--	*	*	0.0.0.0/0	0.0.0.0/0
0	0	ACCEPT	ah	--	*	*	0.0.0.0/0	0.0.0.0/0
0	0	ACCEPT	udp	--	*	*	0.0.0.0/0	224.0.0.251
			udp dpt:5353					
0	0	ACCEPT	udp	--	*	*	0.0.0.0/0	0.0.0.0/0

```

                                udp dpt:631
47 3544 ACCEPT    all -- *      *      0.0.0.0/0      0.0.0.0/0
                                state RELATED,ESTABLISHED
0   0 ACCEPT     tcp -- *      *      0.0.0.0/0      0.0.0.0/0
                                state NEW tcp dpt:22
339 60942 REJECT  all -- *      *      0.0.0.0/0      0.0.0.0/0
                                reject-with icmp-host-prohibited

```

-----

-----

```

iptables -t nat -L -nv
Chain PREROUTING (policy ACCEPT 0 packets, 0 bytes)
pkts bytes target    prot opt in     out     source      destination

Chain POSTROUTING (policy ACCEPT 0 packets, 0 bytes)
pkts bytes target    prot opt in     out     source      destination

Chain OUTPUT (policy ACCEPT 0 packets, 0 bytes)
pkts bytes target    prot opt in     out     source      destination

```

-----

-----

```

service iptables stop
Flushing firewall rules:                [ OK ]
Setting chains to policy ACCEPT: mangle filter      [ OK ]
Unloading iptables modules:              [FAILED]

```

Yet again all VPS could not be conected to.

Thanks
