
Subject: *CLOSED* OpenVZ API?

Hi,

Does OpenVZ have an API, eg: you can connect to it via a network socket, fire XML at it and create a new VPS, or something akin to that?

If not, are there any plans to create one?

What have other people done in this regard? eg: if you want to automate certain processes, is it just a case of writing a script that runs the appropriate commands?

Thanks,
Chris
