if i use vzsplit to create 8 servers,
and i add a new server, i become:

[root@ronny html]# vzcalc 3
Resource Current(%) Promised(%) Max(%)
Memory 0.16 105.00 105.00

?!

this is not normal, ok should be 15 - 20% but not 105 % ?!
thanks
Ronny

damn

i forgot vzcfgvalidate
now it works. )))))
