I have followed the Centos Upgrade 4.x to 5.0 located here
http://wiki.openvz.org/Centos_Upgrade_4.x_to_5.0
and everything is working fine except when I do vzyum CTID upgrade

Total download size: 162 M
Is this ok [y/N]: y
Downloading Packages:
warning: rpmts_HdrFromFdno: V3 DSA signature: NOKEY, key ID e8562897

Public key for chkconfig-1.3.30.1-2.i386.rpm is not installed

How can I get the correct keys for the files?

Thanks,
timgerr

Now this is what I am getting when I run vzyum 1001 update
vzyum 1001 upgrade
exec /usr/share/vzyum/bin/yum -c /vz/template/centos/5/i386/config/yum.conf --installroot /vz/root/1001 --vps=1001 upgrade
Setting up Upgrade Process
Setting up repositories
centos5-vz-addons 100% |=========================| 951 B 00:00
centos5-updates-released 100% |=========================| 951 B 00:00
centos5-base 100% |=========================| 1.1 kB 00:00
Reading repository metadata in from local files
primary.xml.gz 100% |=========================| 226 kB 00:00
http://mirror.centos.org/centos/5/updates/i386/repodata/primary.xml.gz: [Errno -1] Metadata file does not match checksum
Trying other mirror.
Error: failure: repodata/primary.xml.gz from centos5-updates-released: [Errno 256] No more mirrors to try.

Can someone help me, I need to get Centos 5 up and running.

Thanks,
timgerr

I dont have the problem anymore because I reformatted my server for a fresh new VM environment.
