Hi,

Which the command to see the amount of memory and processor that one vps is consuming? I tried some, but I did not obtain.

Memory usage can be obtained by vzcalc command.

There is no utility to see cpu usage by VPS, but
this information can be obtained from
/proc/vz/vestat file. What do digits in this file mean is explained in this thread:
http://forum.openvz.org/index.php?t=msg&goto=2790&&a mp;a mp;a mp;srch=vestat#msg_2790
Also this thread can be useful for you:
http://forum.openvz.org/index.php?t=tree&goto=3602&# msg_3602

Good luck!
