i installed openvz on QuadCore Q9300, but when i check at server information in WHM , say like this :

Processor #1 Vendor: GenuineIntel
Processor #1 Name: 06/17
Processor #1 speed: 2651.598 MHz
Processor #1 cache size: 3072 KB

how to fix it?

Hello,

what does it mean WHM?
We need to understand how WHM obtain that information to determine if it is OpenVZ or not OpenVZ specific problem.

Hello,

it worth asking cpanel support first.
