Just wondering when 2.6.27 is going to go official and be ready to use?

Hello,

would you please clarify what does it mean "official"?
Does it mean the same as "stable" or not?
Anyway, may be you're looking for this
http://download.openvz.org/kernel/branches/2.6.27/
?

Yeah - I'm talking about stable. As I understand it 2.6.24 is the newest stable version?

According to http://download.openvz.org/kernel/
2.6.24 is the development branch.

Is 2.6.27 considered to be as stable as 2.6.24?
