Hi Guys,

Just playing around with openvz but I can't add a package group a VE.

```
[root@kwtest /]# vzyum 202 groupinstall "Development Tools"
exec /usr/share/vzyum/bin/yum -c /vz/template/centos/4/i386/config/yum.conf --installroot
/vz/root/202 --vps=202 groupinstall Development Tools
```

Setting up Group Process

Setting up repositories

centos4-vz-addons 100% |=====| 951 B 00:00

centos4-base 100% |=====| 1.1 kB 00:00

centos4-updates-released 100% |=====| 951 B 00:00

Setting up repositories

Reading repository metadata in from local files

Warning: Group Development does not exist.

Warning: Group Tools does not exist.

No packages in any requested group available to install

I've tried with and without quotes, any suggestions please.
