Hi!
I did notice the sticky about posting networking problems.
I will use it later..but..it really does not apply to this.

I know what's wrong..I just don't know how to fix it..to change the incorrect value.

Ok..no communication between node and VM's.

From within the VM:

ipconfig displays:

venet0:0 blahblah... All three entries are just the ip assigned to the vm. I know for a fact:
Bcast:0.0.0.0

or at least that's how it is on a working node.

How do I change this value of bcast?

It was too easy to edit ifcfg-venet0:0 and put it in there. Does not work.

Help!

Thanks!

Bryon

Hi,

if you want using the broadcast traffic, venet doesn't suit you. Please use veth instead
http://wiki.openvz.org/Veth
