I am having problems to configure a stateful ip6tables on OpenVZ.

ip6tables -A OUTPUT -m state --state RELATED,ESTABLISHED -j ACCEPT
ip6tables v1.2.11: Couldn't load match `state':/lib64/iptables/libip6t_state.so: cannot open shared object file: No such file or directory

Try `ip6tables -h' or 'ip6tables --help' for more information.
ip6tables -A INPUT -m state --state RELATED,ESTABLISHED -j ACCEPT
ip6tables v1.2.11: Couldn't load match `state':/lib64/iptables/libip6t_state.so: cannot open shared object file: No such file or directory

Try `ip6tables -h' or 'ip6tables --help' for more information.

Are you that this is an OpenVZ specific problem?

Quote:
/lib64/iptables/libip6t_state.so No such file or directory

Do you have such file on a system?
