Subject: Ubuntu 10.04LTS templates broken?

OpenVZ's published Ubuntu 10.04LTS templates do not autostart networking upon container restarts. There's nothing obvious in error logs, and I can't find much information on this while Googling around. Is this a known issue? Does it have a workaround?

I've had the same issue after a recent 'apt-get upgrade' to my Ubuntu 10.04 containers.

http://git.openvz.org/?p=vzctl;a=commit;h=d9757f798e055d31d1e5d985f428ddd7f2cb3a99

debian-add_ip.sh: fixlet for Ubuntu networking

In Ubuntu's /etc/init/networking.conf there are the following lines:

start on (local-filesystems
and stopped udevtrigger)

Our templates change it to:

start on local-filesystems

The problem is after apt-get upgrade this file is recreated and these modifications are lost. We have to take care of fixing it on every IP adding operation.

Hope that helps!
