Hi:

when I execute this command as below, it turn out to be error

iptables -t nat -A POSTROUTING -o venet0 -j MASQUERADE
iptables: Unknown error 4294967295

i want to install OpenVPN, but face many many difficute.

have no vz file under this derictory:
[root@addison /]# cd etc/sysconfig/
[root@addison sysconfig]# ls
authconfig crond iptables-config modules networking readonly-root sendmail syslog
cbq i18n lm_sensors netconsole network-scripts rhn snmpd.options udev-stw
console init mkinitrd network rawdevices saslauthd snmptrapd.options xinetd

Anyone can give me some suggestions?

Thanks!

have you follow this instructions ?
wiki.openvz.org/Setting_up_an_iptables_firewall#Setting_up_a_firewall_that_allows_per-container_configuration

load module on HN, edit your vz.conf file ?
