Subject: Strange problems on New Node (1month)

View Forum Message <> Reply to Message

My problem is that simple:

The System after 12days of UPTIME it is crashing! after that crashing, it has no network access, also the Send CTRL+ALT+DELETE from my ISP's console is doing nothing. So I assume it is an Kernel panic issue.

The problem is, that I requested from them an Console to access it, but they NEVER inputed console, and the system came up by it self after 3.5 hours.

Now is there anything i can to, in order not to need the Console and get an Kernel Panic or the problem writen down? Or can i find somewhere a log file in order to help you, help me?

OS: Centos 5.5
uname -a: Linux lemonpie.hjsrv.net 2.6.18-194.26.1.el5.028stab079.2 #1 SMP Fri Dec 17 19:25:15 MSK 2010 x86_64 x86_64 x86_64 GNU/Linux

Installed by SolusVM
Repos: Centos, openvz and soluslabs
