Subject: How does the clock work in OpenVZ? Posted by Wolfgang Schnerring on Fri, 09 Mar 2007 09:30:22 GMT View Forum Message <> Reply to Message

Hello,

I'm trying to understand whether OpenVZ does anything special about time, and thus whether I need to take care to somehow synchronize the clocks of HN and VEs. For example, can gettimeofday(2) return different things in the HN and in a VE?

Thanks for your help, Wolfgang
