Hi,

Ive just started to use OpenVZ and it totally rocks but one thing I would really like is to be able to add a decription to each VE - such that a vzlist might look like this

```
# vzlist
 VEID      NPROC STATUS  IP_ADDR        HOSTNAME    DESCRIPTION
 101          13 running 172.30.60.101   server101   Mediawiki box
 102           6 running 172.30.60.102   server102   Zenoss Network monitor
 103          13 running 172.30.60.103   server103   Webserver Dev box
 105           3 running 172.30.60.105   server105   Asterisk
```

How do I ask for it as a feature request? Or did I just do it
