Hi,

Ive just started to use OpenVZ and it totally rocks but one thing I would really like is to be able to add a decription to each VE - such that a vzlist might look like this

vzlist

| VEID | NPROC | STATUS | IP_ADDR | HOSTNAME | DESCRIPTION |
|------|-------|---------|---------------|-----------|------------------------|
| 101 | 13 | running | 172.30.60.101 | server101 | Mediawiki box |
| 102 | 6 | running | 172.30.60.102 | server102 | Zenoss Network monitor |
| 103 | 13 | running | 172.30.60.103 | server103 | Webserver Dev box |
| 105 | 3 | running | 172.30.60.105 | server105 | Asterisk |

How do I ask for it as a feature request? Or did I just do it
