Hi,

Ive just started to use OpenVZ and it totally rocks but one thing I would really like is to be able to add a decription to each VE - such that a vzlist might look like this

vzlist

VEID	NPROC	STATUS	IP_ADDR	HOSTNAME	DESCRIPTION
101	13	running	172.30.60.101	server101	Mediawiki box
102	6	running	172.30.60.102	server102	Zenoss Network monitor
103	13	running	172.30.60.103	server103	Webserver Dev box
105	3	running	172.30.60.105	server105	Asterisk

How do I ask for it as a feature request? Or did I just do it
