dev wrote on Sun, 11 March 2007 02:40BTW, do you have NAT'ted IP addresses as well (thread subject)? In this case you don't need ARPSEND on VE startup at all.

Though IP address 68.128.52.229 doesn't look local, which means you should have been granted to use it by your provider. Which one is correct?

Ohh...yeah. I guess I'm in the wrong thread. I just searched for the same problem I'm having and dumped into the thread. I'm not running on a Strato nor am I running NATd.

You're correct in that I am running a public IP which has been assigned to me by my provider.
