If you test on native hardware you need to download and install our iso image (warning: formats the Harddisk when installing):

http://www.proxmox.com/cms_proxmox/cms/upload/bittorrent/proxmox-mailgateway_1.7.iso

(or the vmware appliance if you want to test that).

Also apply the hotfix after installation (use the web interface to apply the hotfix (Server/Updates)).

http://www.proxmox.com/cms_proxmox/cms/upload/bittorrent/hotfix_1.7-1702.bin
