Hello

I have a SuSE 10 HW-Node with the SuSE 10 Kernel from  
<http://openvz.org/download/kernel/suse10/> installed and running. As the  
SuSE Kernel is rather old I would like to use the  
2.6.18-ovz028test018.1 instead but when I try to install it with rpm  
-ihv <kernel-rpm> I get

Failed dependencies

initscripts >= 5.83 is needed

mkinitrd >= 3.5.5 is needed

Any hints how to get around this or how to update mkinitrd and initscripts??

Thanxs

Andreas
