Hello

I have a SuSE 10 HW-Node with the SuSE 10 Kernel from <http://openvz.org/download/kernel/suse10/> installed and running. As the SuSE Kernel is rather old I would like to use the 2.6.18-ovz028test018.1 instead but when I try to install it with `rpm -ihv <kernel-rpm>` I get

Failed dependencies

initscripts >= 5.83 is needed

mkinitrd >= 3.5.5 is needed

Any hints how to get around this or how to update mkinitrd and initscripts??

Thanx

Andreas
