Hello!

Can you give an access to node?

If not, then try following:

1. Increase log level of CPT modules with commands:

```
echo 3 > /proc/sys/debug/cpt
```

```
echo 3 > /proc/sys/debug/rst
```

2. Checkpoint and restore VE in question

After that send me kernel logs and image file. Image file can be huge, so please do not send it to list.

Regards,
Andrey
