Hello,

Please, try to do

```
vzctl stop 104
```

```
vzquota drop 104
```

```
vzctl start 104
```

before starting migration and inform us if it helps?

BTW, you can turn off OVZ disk quota (for all VEs) by modifying /etc/init.d/vz.conf file:

DISK_QUOTA=no Be aware: you should turn off all VEs on this node before modifying this global configuration file.

Thank you,
Vasily.
