
Subject: ***SOLVED*** Can't stop the VE

I run a VE which try to use an NFS mount. It looks like the NFS mount was lost. I tried to restart the VE first without the --fast option but the results are the same.

```
titan ~ # vzctl stop 108 --fast
```

```
Stopping VE ...
```

```
Unable to stop VE: operation timed out
```

There is a process in D state inside the VE:

```
6376 ?      Ss   0:07 init [3]
```

```
8501 ?      D    0:00 \_ /usr/sbin/exim -Mc 1HVMqs-0002Ta-5A
```

```
8985 ?      Ds   0:00 \_ shutdown -h 0 w
```

Is there anything I can do it? The machine is far away from me.

Thanks for any ideas.
