> from the box is SuSE.

Do you mean the only distribution OpenVZ works with?

Or you mean that you like SuSE and it the only distro which is working for you? :)

> Now many of my boxes run SuSE with xen, but I like  
> to run also OpenVZ. Is it possible to run OpenVZ in a domU from xen?

1. Most easy way is to replace SuSE kernel with OpenVZ one.

2. It is possible to run OpenVZ in a domU, but for this you need  
to apply Xen patches on top of OpenVZ. This works, but requires some  
efforts, i.e. not out of the box :/

Actually, after applying Xen patches you can run OpenVZ both in domU and dom0.

Thanks,  
Kirill
