I tried to add

```
* called under bridge lock */
static void br_flood(struct net_bridge *br, struct sk_buff *skb, int clone,
    void (*__packet_hook)(const struct net_bridge_port *p,
        struct sk_buff *skb))
{
    struct net_bridge_port *p;
    struct net_bridge_port *prev;

+    printk("Flood !\n");
```

to net/bridge/br_forward.c but got nothing in the system log (dmesg).
