I tried something like this but got a kernel panic:

```
static int veth_xmit(struct sk_buff *skb, struct net_device *dev)
{
    struct net_device_stats *stats;
    struct net_device *rcv = NULL;
    struct veth_struct *entry;
    int length;

    const unsigned char *dest = eth_hdr(skb)->h_dest;
    printk("veth_xmit dst: %02x:%02x:%02x:%02x:%02x:%02x\n",
           (int)(dest[0]),(int)(dest[1]),(int)(dest[2]),(int)(dest[3]),(int)(dest[4]),(int)(dest[5]));
```
