All,

It's working !

I compiled the kernel again changing the following parameters:

FROM:
CONFIG_UBC_KEEP_UNUSED=y
CONFIG_UBC_DEBUG_ITEMS=y
CONFIG_UBC_UNLIMITED=y

TO:
CONFIG_UBC_KEEP_UNUSED is not set
CONFIG_UBC_DEBUG_ITEMS is not set
CONFIG_UBC_UNLIMITED is not set

Anyone can explain to me why vzcalc doesn't work if I change this values?

For what are these parameters used?

Thanks a lot
