Hello,

I would like to link my C program with vzctl library to be able to start and stop virtual machines.

My question is the same as Mateus Baur had, see

http://forum.openvz.org/index.php?t=msg&goto=10586&# msg_10586

Error message:

/usr/lib/libvzctl-0.0.2.so: undefined reference to `g_log'

collect2: ld returned 1 exit status

How should I link it properly?

Thank you in advance

S. Kunc
