current libvzctl imho is brain damaged as it was never actually been designed properly. after the licensing question will be resolved I think it will be greately reworked. If you still want to give it a try then follow Dmitry Levin recommendations.

Thanks, Kirill Standa Kunc wrote: > Hello. > > I would like to link my C program with vzctl library to be able to > start and stop virtual machines. > My question is the same as Mateus Baur had, see > http://forum.openvz.org/index.php?t=msg&goto=10586&# msg\_10586 > > Error message: > /usr/lib/libvzctl-0.0.2.so: undefined reference to `g log' > collect2: Id returned 1 exit status > How should I link it properly? > Thank you in advance > S.
