Hello,

yes it is possible. As you probably know vzctl has --ipadd option. Using this option you can add

```
root@HN# vzctl set <veid> --ipadd <IP-1> --save
```

```
root@HN# vzctl set <veid> --ipadd <IP-2> --save
```

This will create two venet devices in VE. Then you should check that routing is set properly on HN.

Vasily.
