I edited /vz/template/centos/4/i386/config/yum.conf and replaced gpgcheck=1 with gpgcheck=0.
Now I get this:

Transaction Check Error: file /sbin/nash conflicts between attempted installs of
dummy-centos-4-1.0-3.swsoft and mkinitrd-4.2.1.8-1

Then I removed the vztmpl and reinstalled them. I removed the caches with vzpkgcache -r and
recreated them with vzpkgcache -f. The above error message keeps coming up.
