tcpdump gives no output when I do that, except of this message at start time:

```
tcpdump: WARNING: arptype 65535 not supported by libpcap - falling back to cooked socket
tcpdump: WARNING: venet0: no IPv4 address assigned
tcpdump: verbose output suppressed, use -v or -vv for full protocol decode
listening on venet0, link-type LINUX_SLL (Linux cooked), capture size 96 bytes
```

BTW: I had to change /etc/sysconfig/network-scripts/ifcfg-venet0 from BOOTPROTO=dhcp to BOOTPROTO=static
