Hey, guys.

Here's the tech's concern:

> Here is the link that describes a work around for the openvz problem. Note  
> that fedora core 6 64bit has not been tested. The first paragraph titled  
> "THE PROBLEM" described what I said:  
>  
> [http://wiki.openvz.org/Install\\_OpenVZ\\_on\\_a\\_x86\\_64\\_system\\_Centos-Fedora](http://wiki.openvz.org/Install_OpenVZ_on_a_x86_64_system_Centos-Fedora)

Any comments?
