I tried to install APF on OpenVZ, following this guide:

http://kb.swsoft.com/article_130_875_en.html

but i got error messages when trying to start APF:

iptables: No chain/target/match by that name

iptables: No chain/target/match by that name

iptables: No chain/target/match by that name

iptables: No chain/target/match by that name

iptables: No chain/target/match by that name

i also run this command:

With the commands:

```
modprobe xt_tcpudp
```

```
modprobe ip_conntrack ip_conntrack_enable_ve0=1
```

from: http://forum.openvz.org/index.php?t=msg&goto=8384&&a mp;srch=apf#msg_8384

but still get the same error. how to fix this?

Best Regards,

Markus
