i think i fix the error message:

iptables: No chain/target/match by that name

by changing 'ml ipt_multiport 1' to 'ml xt_multiport'.

but i still having problem, APF won't run properly

executing apf -s will cause all connection to be blocked

any help will be appreciated

Best Regards,
Markus

Subject: [Users] install APF on OpenVZ

I tried to install APF on OpenVZ, following this guide:
http://kb.swsoft.com/article_130_875_en.html

but i got error messages when trying to start APF:
iptables: No chain/target/match by that name
iptables: No chain/target/match by that name
iptables: No chain/target/match by that name
iptables: No chain/target/match by that name
iptables: No chain/target/match by that name

i also run this command:
With the commands:

modprobe xt_tcpudp

modprobe ip_conntrack ip_conntrack_enable_ve0=1

from: http://forum.openvz.org/index.php?t=msg&goto=8384&&a mp;srch=apf#msg_8384

but still get the same error. how to fix this?
Best Regards,
Markus
