Subject: [Users] strange problem with quota when try to install using rpm

i had problem when installing an rpm, below is the screen capture:

```
rpm -ivh slocate-2.7-13.el4.6.i386.rpm
```

```
Preparing... ##### [100%]
```

```
1:slocate warning: /etc/updatedb.conf created as /etc/updatedb.conf.rpmnew
```

```
##### [100%]
```

```
error: unpacking of archive failed on file /usr/bin/locate: cpio: chown failed - Disk quota exceeded
```

i run it as 'root', how come root have quota limit?

running 'quota' will result:

```
quota
```

```
Disk quotas for user root (uid 0): none
```

Best Regards,
Markus
