You need to use a 2.6.18 kernel. 2.6.9 openvz does not support checkpointing, which is using for live migration.

Are you sure? ...sorry but my vzmigrate works fine with 2.6.9stab kernel (Between CentOS4-Nodes). I migrate Slackware- and CentOS-VPS online with vzmigrate. So i think it's possible to migrate online with kernel 2.6.9stab. (My english maybe very bad but my online-migration with 2.6.9stab kernel works very good)
