yes, it is inside VE and the disk free space is still very big, the VE have 40GB and only use 2.7GB:

Filesystem	Size	Used	Avail	Use%	Mounted on
/dev/simfs	40G	2.7G	38G	7%	/
/tmp	40G	2.7G	38G	7%	/var/tmp

Best Regards,
Markus

Are you trying to install slocate inside VE?
Even root is limited by VE disk limit.
run:
df -h
inside VE.

to increase disk quotas use:
vzctl set <VEID> --diskspace N:M --save

Thanks,
Kirill

Subject: [Users] strange problem with quota when try to install using rpm

i had problem when installing an rpm, below is the screen capture:

```
rpm -ivh slocate-2.7-13.el4.6.i386.rpm
Preparing... ##### [100%]
 1:slocate      warning: /etc/updatedb.conf created as /etc/updatedb.conf.rpmnew
##### [100%]
error: unpacking of archive failed on file /usr/bin/locate: cpio: chown failed - Disk quota exceeded
```

i run it as 'root', how come root have quota limit?

running 'quota' will result:

```
quota
Disk quotas for user root (uid 0): none
```

Best Regards,
Markus
