I think I found what is the cause.. it is because I set --quotauidlimit too low, I increase the number and the problem is gone. thanks for all the helps.

Best Regards,  
Markus

Subject: Re: [Fwd: Re: [Users] strange problem with quota when try to install using rpm]

Hello,

can you do the following actions, please:

```
# vzctl stop <veid>
Stopping VE ...
VE was stopped
VE is unmounted
# vzquota drop <veid>
# vzctl start <veid>
Starting VE ...
Initializing quota ...
VE is mounted
Setting CPU units: 1000
VE start in progress...
```

After that try to install/extract files in VE as you did in previous attempts. If these actions still fail, please post here the output of the following commands:

```
# vzquota stat <veid>
# vzctl exec <veid> df
# cat /etc/vz/conf/<veid>.conf
# cat /etc/vz/vz.conf
# uname -a
```

Thank you,  
Vasily
