Thanks Morik and Vasily!

failcnt for tcprcvbuf and othersuckbuf is the problem, so Ill just raise them alittle

resource	held	maxheld	barrier	limit	failcnt
tcprcvbuf	0	454392	319488	524288	238
othersockbuf	130980	133032	132096	336896	16061

This one I should have figured out. Thanks!
