Subject: backup VE with vzdump Posted by Andreas Wittig on Wed, 23 May 2007 11:29:17 GMT View Forum Message <> Reply to Message

Hi!

I'd like to have a complete backup of a VE. Is vzdump the right tool to do this? Which paramter, should I use --stop, --suspend or --snapshot? I dont't really understand the difference?

Is there anything else I should consider?

Regards! Andreas
