Wow, these forums are barely active!

However, my scripts have been released.

You can download them here: http://vzspot.com/?p=4

If you want to read the README before you download them (To get a idea of what they do) click here: http://www.vzspot.com/downloads/ovz-scripts/README

From the download page you can download a ZIP archive or a auto installer (Just a serious of WGET's)
