Vasily Tarasov wrote on Sat, 26 May 2007 17:09Hello,

In order to use some kernel module in VE, it should be loaded on HN. However it won't help in your case, because ppp is not virtualized at the moment:

Vasily.

thank you for your reply , so I cant use pptpd to setup my vpn server at the moment , but is there any chance to use openvpn to setup my vpn server on my VPS ? is it compatible with openvz ?
Regards
