Hi,

I'm getting the error, 'E: You don't have enough free space in /var/cache/apt/archives/' when trying to use apt-get to install anything in debian 4. I am using the debian 4 template from <http://openvz.org/download/template/cache/>.

df shows-

Filesystem	1K-blocks	Used	Available	Use%	Mounted on
simfs	7697152	197632	7499520	3%	/
tmpfs	256752	0	256752	0%	/lib/init/rw
tmpfs	256752	0	256752	0%	/dev/shm

I've also verified that there are no quotas in place. I've played around with putting the cache directory elsewhere with the same result.

Has anyone come across this before.?

Many thanks,

Carl
