Well, this fix that problem and now i have another:

```
LD [M] lib/zlib_deflate/zlib_deflate.o
Building modules, stage 2.
MODPOST
WARNING: "ub_sock_getwres_other" [net/unix/unix.ko] undefined!
make[2]: *** [__modpost] Error 1
make[1]: *** [modules] Error 2
make[1]: se sale del directorio `/usr/src/linux-2.6.18'
make: *** [debian/stamp-build-kernel] Error 2
```

Maybe i should try the 2.6.20? Or continue with this?

Thanks.
