Thank you Vasily,

with this patch, boot problem is resolved.

But checkpointing still doesn't work ?!

```
root@desk-h8:~# vzctl chkpnt 999 --dump --dumpfile /vz/999_dump
```

```
Setting up checkpoint...
```

```
  join context..
```

```
  dump...
```

```
Can not dump VE: Invalid argument
```

```
iptables-save exited with 255
```
