
Subject: *BUG REPORTED* vzmigrate with NFS
Posted by [chansen](#) on Thu, 07 Jun 2007 20:53:31 GMT

Does anyone know why checkpoints fail when an NFS volume is mounted? I was hoping to be able to do a live migration of VE but several services' config files and binaries reside on a global NFS mount. Below is a sample of the migration output (with minor modifications to protect the innocent) Is there any hope for a resolution to this in the future?

Thanks,
Chris

```
root@hosta:~# time vzmigrate -r no --online -v hostb 1004
OPT:-r
OPT:--online
OPT:-v
OPT:hostb
